

HELLO! I'M YOUSSEF, DIGITAL DESIGNER & UI UX CONSULTANT.

I work remotely with multidisciplinary teams to create impactful digital experiences—mostly Web designs. My current verticals of interest are Photography, AI Technology, Music, and sports.

TOOLS

LET'S TALK

To talk collaborations or partnerships

Benlarbidelai.work@gmail.com

TRAVINGLO - LANGUAGE APPLICATION

01

PROBLEM

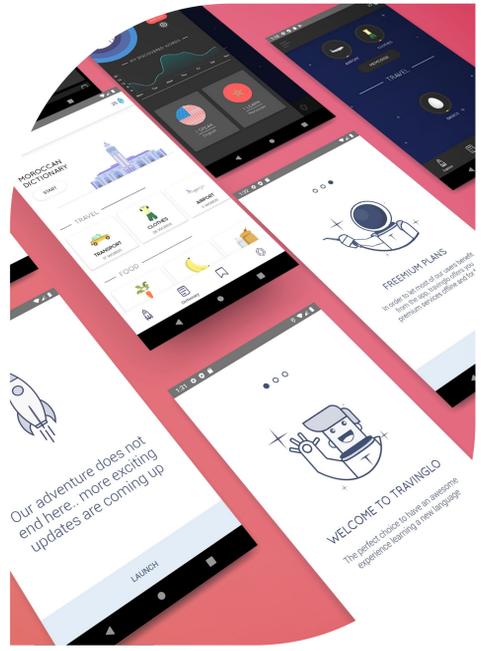

Existing language apps fall short in offering a comprehensive understanding of dialects. Users are limited to standard languages, hindering effective communication and cultural immersion.

NEEDS

Users require a platform that offers a holistic approach to language learning, encompassing both standard languages and their associated dialects. Effective interactive and immersive learning tools are necessary to help users grasp the nuances of various dialects and build confidence in diverse linguistic environments.

SOLUTION

Travinglo presents a comprehensive solution by addressing dialects thoroughly, ensuring users gain a nuanced understanding. Through its innovative approach, Travinglo offers interactive lessons and immersive experiences that go beyond traditional language learning methods.

ATLAS LIFESTYLE - BOOKING APPLICATION

02

PROBLEM

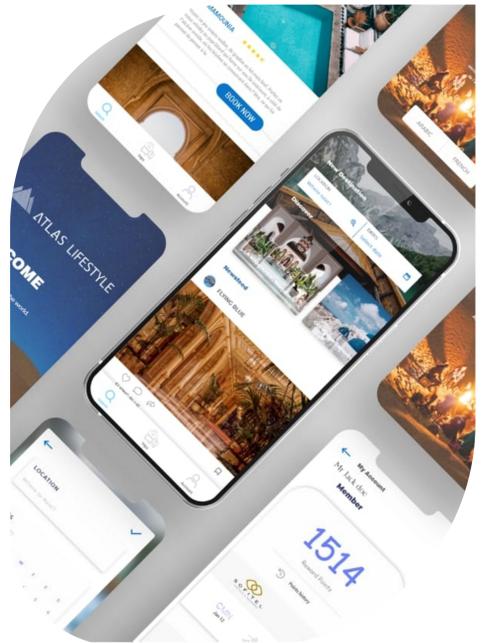

Navigating fragmented lifestyle services leads to inconvenience, inefficiency, and the need to manage multiple platforms, causing frustration and wasted time.

NEEDS

Users seek a unified solution to consolidate their lifestyle needs. They desire a centralized platform that streamlines access to various services, simplifying their daily routines and eliminating the hassle of managing multiple accounts and platforms.

SOLUTION

Atlas Lifestyle addresses these challenges by offering a unified platform where users can access all their lifestyle needs effortlessly. With its intuitive interface and comprehensive range of services, Atlas Lifestyle provides convenience and efficiency, enhancing the user experience significantly.

POLYDESIGN - TRACKING APPLICATION

03

PROBLEM

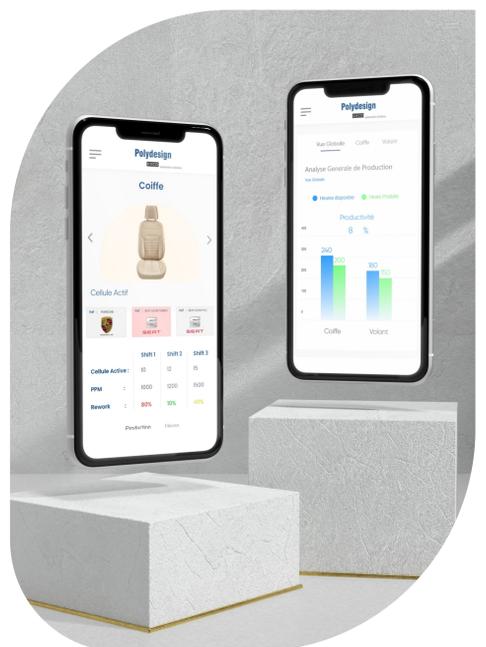

In the automotive industry, the process of tracking production is often fragmented and disjointed, leading to significant oversight challenges. Without a cohesive system in place, manufacturers struggle to maintain meticulous oversight of every aspect of production.

NEEDS

Automotive manufacturers require centralized, real-time production tracking for meticulous oversight.

SOLUTION

Polydesign provides a comprehensive software solution, offering centralized, real-time production tracking to ensure meticulous oversight in the automotive industry.

Portfolio Item

Engaging in purposeful, strategic endeavors for visionary brands, both independently and as a collaborative team member, to deliver significant and enduring results.
